Summary

Paramedic-turned-programmer with a strong foundation in problem-solving and analytical thinking. Applied these skills while earning an associate's degree in computer science, specializing in Java, JavaScript, and web development. As a Flight Paramedic, managed critical patients in high-pressure environments, refining adaptability and responsibility. Now seeking to leverage my diverse skill set in a creative and challenging software development role.

Experience

Full-Stack Software Developer

Spherexx.com

Mar 2022 - 2024 (2 years)

•Developed and maintained front-end and back-end features using ASP.NET, CSS, HTML, JavaScript, VBScript, Classic ASP, SQL and Vue.

•Integrated and customized CMS components to seamlessly connect with the website.

•Analyzed and refactored legacy code to enhance dynamism and maintainability.

•Ensured website compliance with ADA regulations by implementing accessibility best practices, referencing the a11y project guidelines for inclusive design and development.

Paramedic

Mercy Regional EMS/EMSA/Tulsa Life Flight

Mar 2010 - Mar 2022 (12 years 1 month)

•Combined for Brevity

•Applied patient care protocols systematically, adapting as needed for optimal outcomes.

•Engaged in ongoing professional development through continuous education to stay current with industry standards and advancements.
